DETAILED ACTION

Priority

1. If applicant desires priority under 35 U.S.C. 120 based upon a previously filed application, specific reference to the earlier filed application must be made in the instant application. For benefit claims under 35 U.S.C. 120, 121 or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of the applications. This should appear as the first sentence of the specification following the title, preferably as a separate paragraph unless it appears in an application data sheet. The status of nonprovisional parent application(s) (whether patented or abandoned) should also be included. If a parent application has become a patent, the expression "now Patent No. ____" should follow the filing date of the parent application. If a parent application has become abandoned, the expression "now abandoned" should follow the filing date of the parent application. (Note: parent application Ser. No. 09/117,016 is now Patent No. 6,370,745.)

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Skaalen et al. (US#4599030).

4. Regarding claim 1, Skaalen discloses a vehicle 10 for raising and transporting a structure, the vehicle comprising: a main frame 31,32,34-37 supported on spaced wheels 16-19 which

Art Unit: 3677

locate astride the structure when the vehicle is positioned over the structure; an attachment frame 14 for connection to the structure, the attachment frame located within the main frame; and a powered lifting mechanism 12 for raising the attachment frame relative to the main frame.

5. Although Skaalen fails to disclose the vehicle being used in conjunction with a crypt lid, the crypt lid is not being positively claimed and therefore represents the intended use of the vehicle. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). In this case, the vehicle is capable of being used in conjunction with a crypt lid.

6. Regarding claim 2, the vehicle is being viewed and labeled as a "trailer" as a trailer is defined as "a vehicle for transporting something" (Merriam-Webster's Collegiate Dictionary, Tenth Addition).

Allowable Subject Matter

7. Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 7-12 are allowed.

Art Unit: 3677

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
